FACT SHEET · OCTOBER 2026

Okey Masters 101

Open your melds in front of you. Like a real table.

THE GAME

Okey is Türkiye's coffee-house tile game: four players, 106 numbered tiles, a rummy relative. Okey Masters 101 is a multiplayer 101 Okey game built around the real table. In most digital Okey games opened melds pile into one shared list; here **each of the four seats has its own meld area**. Players open melds in front of themselves, read opponents' melds in front of them, and tiles fly across the table with the same animation on all four phones.

HIGHLIGHTS

- **Four types, one list:** Classic, Raise (Katlamalı), Blood (Kanlı), 51. Individual or partners; with or without penalties; 1–13 hands.
- **No chip worries:** the free table is free and unlimited; Play Now seats you with one tap.
- **No interrupting ads:** no interstitial, banner or app-open ads; an ad only when a player asks for one, for a reward.
- **Masters:** a Daily Cup every day, a Weekly Knockout with a Sunday final, a 28-day Masters League season; 12 titles, frames that cannot be bought, a trophy cabinet.
- **From Novice to Okey Sultan:** nine mastery ranks.
- **Coffee-house culture:** Turkish-motif meld effects (Concrete Slam, Double Six, Nazar Burst, Drum & Zurna, Bosphorus Ferry); 23 table treats and pranks including tea, simit, Turkish coffee and baklava; lounge music.
- **Social:** friends, private tables, one-link WhatsApp table invites, clubs and club chat, blocking and reporting.
- **Tutorials:** first practice, Raise and Blood tutorial tables, page tours; rules and a score calculator on the website.
- **Fair dealing:** tiles are shuffled on the server with cryptographic randomness; buying chips does not affect the deal.
- **Cosmetic purchases only:** no loot boxes; nothing bought gives an in-game advantage.

FACT SHEET

Developer	SE Games, Antalya, Türkiye · independent studio, founded 2018

Press kit	segames.com.tr/en/press

STUDIO

SE Games is an independent game studio founded in 2018 and based in Antalya, Türkiye. A small, focused team builds everything itself, from design to server infrastructure. Okey Masters 101 is the studio's first game; the whole stack, including the game server, the bots and the operations tools, was written in-house.

STUDIO STATEMENT

> "We learned Okey at a table where everyone opens their melds in front of themselves and you can see who opened what. On phones that layout disappeared. We built Okey Masters 101 to bring that table back: the free table stays free, and no ad interrupts a hand."
